

131982-1

IN THE SPECIFICATION

Please amend paragraph [0075] at page 23 of the Specification as follows:

[0001] An example of a polymeric material storage media comprises an injection molded polymeric material substrate that may optionally comprise a hollow (bubbles, cavity, and the like) or filler (metal, plastics, glass, ceramic, etc., in various forms such as fibers, spheres, etc.) core. Disposed on the substrate are various layers including: a data layer, dielectric layer(s), a reflective layer, and/or a protective layer. These layers comprise conventional materials and are disposed in accordance with the type of media produced. For example, for a first surface media, the layers may be protective layer, dielectric layer, data storage layer, dielectric layer, and then the reflective layer disposed in contact with the substrate. A preferred data storage media that may be prepared from the polymeric material described herein is disclosed in Application Serial No. 10/648,609, docket no. 120804 entitled "SUBSTRATE AND STORAGE MEDIA FOR DATA PREPARED THEREFROM" "STORAGE MEDIUM FOR DATA WITH IMPROVED DIMENSIONAL STABILITY" filed August 26, 2003 and copending with the present application.
